

Bid increments for stamps and coins

Dear customers,

In order to make bidding at the auction easier for you, in the following overview we have listed the bid increments (highest bids) and the total purchase price including VAT in euros.

Please note that the VAT rates listed for full taxation and the resulting gross prices only apply to buyers from Austria. For objects sent to private persons in a Member State of the European Union, the VAT rates of the country of delivery apply, which may result in a different gross price.

In our exhibition and in the auction catalogue you will find for each object a detailed description written by our experts, as well as an indication of the applicable taxation (e.g. in catalogue auctions the use of a mark after the catalogue number “+”, “-” or “V”).

Bidding begins with the starting price or at half of the lower estimate, and the starting price can vary to the extent of equalling the lower estimate. Bid increments are in each case between five and ten percent of the last offer, and the item is hammered down to the bidder offering the highest bid. With a bit of luck, you can purchase your desired item at a very attractive price.

Please be aware that it is also possible to place a written absentee bid if you cannot participate at the auction in person - our staff will be happy to advise you!

Enjoy bidding at our auctions!

valid from 1.1.2022
